

# Central R-III School District

## Acceptable Use Policy

This acceptable use Policy is a summary of official Board policies designated EHB and EHB-R. The content and meaning are essentially identical, but all users will be held accountable to all Board policies. The original Board policies may be found on file in the District administrative office.

The Central R-III School District recognizes the educational and professional value of electronics based information technology, both as a means of access to enriching information and as tool to develop skills that students need.

The district's technology exists for the purpose of maximizing the educational opportunities and achievement of district students. The professional enrichment of the staff and Board, and increased engagement of the students' families and other patrons of the district are assisted by technology, but are secondary to the ultimate goal of student achievement.

Use of technology resources in a disruptive, manifestly inappropriate or illegal manner impairs the district's mission, squanders resources and shall not be tolerated. Therefore, a consistently high level of personal responsibility is expected of all users granted access to the district's technology resources. Development of students' personal responsibility is itself an expected benefit of the technology department.

### **Definitions**

For the purposes of this policy and related regulation, procedures and forms, the following terms are defined:

*User* -- any person who is permitted by the district to utilize any portion of the district's technology resources, including but not limited to students, employees, School Board members and agents of the school district.

*User Identification (ID)* -- any identifier which would allow a user access to the district's technology resources, or to any program, including but not limited to, e-mail and Internet access.

*Password* -- a unique word, phrase or combination of alphabetic, numeric and non-alphanumeric characters used to authenticate a user ID as belonging to a user.

### **Technology Administration**

The Board directs the superintendent or designee to create rules and procedures governing technology usage in the district to support the district's policy, as needed. The Board directs the superintendent or designee to assign trained personnel to maintain the district's technology in a manner that will protect the district from liability and will protect confidential student and employee information retained or accessible through district technology resources. Trained personnel shall establish a retention schedule for the regular archival or deletion of data stored on district technology resources in accordance with the *Public School District Retention Manual* published by the Missouri Secretary of State. **Administrators of computer resources may suspend access to and/or availability of the district's technology resources to diagnose and investigate network problems or potential violations of the law or district policies, regulations and procedures.**

## **User Identification and Network Security**

The district technology resources may be used by authorized students, employees, School Board members and other persons such as consultants, legal counsel and independent contractors.

Use of the district's technology resources is a privilege, not a right. No student, employee, or other potential user will be given an ID, password or other access to district technology if he/she is considered a security risk by the superintendent or designee.

Users must adhere to district policies, regulations, procedures, and other district guidelines. All users shall immediately report any security problems or misuse of the district's technology resources to an administrator or teacher.

## **User Agreement**

Unless authorized by the superintendent or designee, all users must have an appropriately signed *User Agreement* on file with the district before they are allowed access to district technology resources. All users must agree to follow the district's policies, regulations and procedures.

In addition, all users must recognize that they do not have a legal expectation of privacy in any email use activities involving the district's technology. A user ID with e-mail access, if granted, is provided to users of this district's network and technology resources only on condition that the user consents to interception or access to all communications accessed, sent, received or stored using district technology in his or her *User Agreement*. The District reserves the right to search and seize records from all District equipment at any given time.

## **Privacy**

A user does not have a legal expectation of privacy in the user's electronic mail or other activities involving the district's technology resources.

## **Content Filtering and Monitoring**

The district will monitor the on-line activities of minors and operate a technology protection measure ("filtering/blocking device") on all computers with Internet access, as required by law. The filtering/blocking device will protect against access to visual depictions that are obscene, harmful to minors and child pornography, as required by law. Because the district's technology is a shared resource, the filtering/blocking device will apply to all computers with Internet access in the district. Evasion or disabling of the filtering/blocking device installed by the district, including attempts to evade or disable, is a serious violation of district policy.

## **Closed Forum**

The district's technology resources are not a public forum for expression of any kind and are to be considered a closed forum to the extent allowed by law.

The district's web page will provide information about the school district, but will not be used as an open forum. The district web page may include the district's address, telephone number, and an e-mail address where members of the public may easily communicate concerns to the administration and the Board.

Any expressive activity involving district technology resources that students, parents and members of the public might reasonably perceive to bear the imprimatur of the school, and which are designed to impart particular knowledge or skills to student participants and audiences, are considered curricular publications. All curricular publications are subject to reasonable prior

restraint, editing and deletion on behalf of the school district for legitimate pedagogical reasons. All other expressive activity involving the district's technology is subject to reasonable prior restraint and subject matter restrictions as allowed by law and Board policies.

### **Damages**

All damages incurred by the district due to the misuse of the district's technology resources, including the loss of property and staff time, will be charged to the user. District administrators have the authority to sign any criminal complaint regarding damage to district technology.

### **No Warranty/Availability/No Endorsement**

The district makes no warranties of any kind, whether expressed or implied, for the services, products or access it provides. The district's technology resources are available on an "as is, as available" basis. Administrators of computer resources may suspend access to and/or availability of the district's technology resources to diagnose and investigate network problems or potential violations of the law or district policies, regulations and procedures.

The district is not responsible for loss of data, delays, non-deliveries, mis-deliveries or service interruptions. The district does not guarantee the accuracy or quality of information obtained from the Internet, or use of its technology resources. Access does not include endorsement of content or the accuracy of the information obtained.
